

**ActronAir**<sup>®</sup>

Australian for air conditioning™

air conditioning  
designed for  
australian living

## ActronAir is Australian made for Australian conditions

There's nowhere else in the world that's quite like Australia, and it takes an Australian air conditioning company to understand and meet the challenges of our diverse climate and unique way of life.

ActronAir is the leading Australian owned ducted air conditioning specialist. We have over 20 years experience and we understand the performance required to make Australian homes more comfortable.

## Innovation comes standard

ActronAir leads the way with a highly sophisticated and intelligent approach to air conditioning design. Our many ground-breaking innovations have led to some of the world's most advanced air conditioning solutions.

Our obsession with innovation, quality and performance also has an important focus – we are continually developing energy efficient solutions for today and the future.

## Quality you can depend on

Each and every ActronAir system is designed and built right here in our Australian manufacturing plant so product support is never far away. We also design and manufacture our own electronic controls ensuring our systems are fully integrated, easy to operate and extremely reliable. When you choose an ActronAir system, you can sit back and relax in total comfort.

Small home or large, whether you are upgrading or building your Australian dream, ActronAir has a ducted system designed to enhance your lifestyle.

## SINGLE-STOREY

Because every household is different, ActronAir allows for custom design and configuration, matching the air flow to your family's lifestyle.

## Make yourself comfortable

When you choose the comfort of an ActronAir system you have the latest, most innovative technology at your fingertips.

With in-built temperature sensors, a simple-to-use touch pad control unit gives you total control of up to 4 zones in your home (8 zones optional). The ActronAir reverse cycle system keeps your home comfortable all year round, keeping you cool by removing heat and humidity in summer and switching effortlessly to warm you in winter.

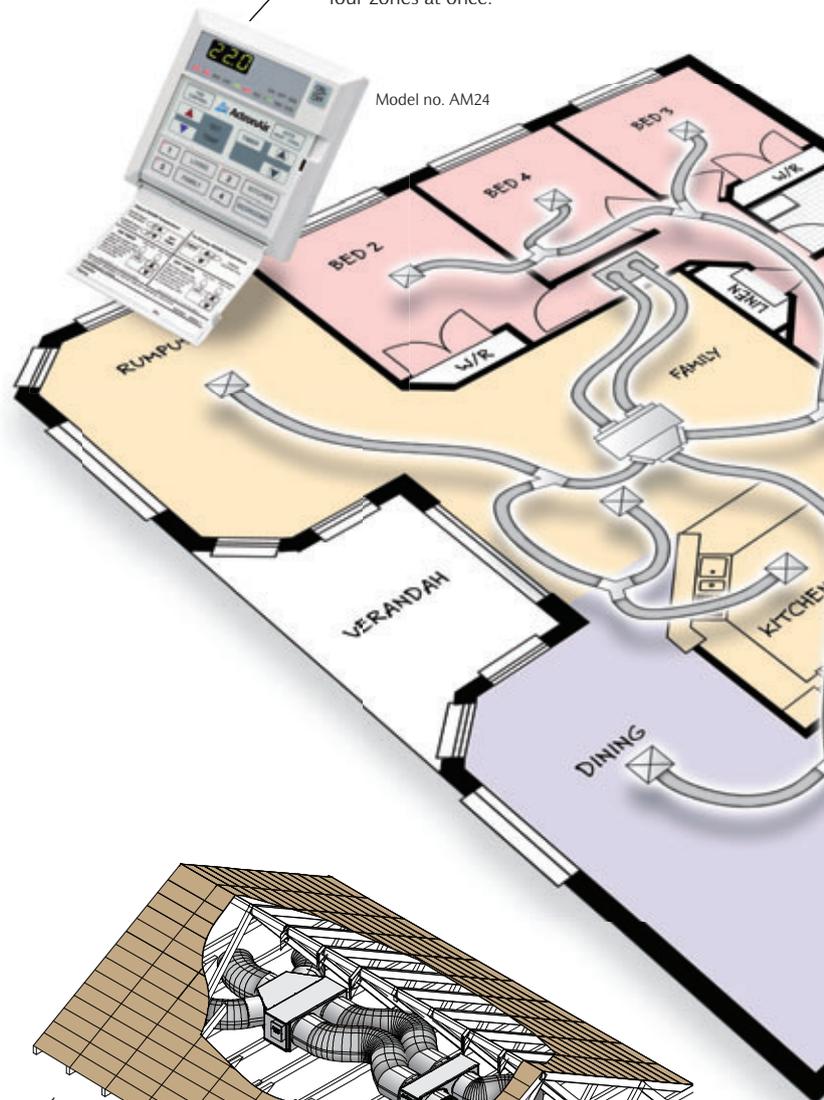

## Life was meant to be easy

Our hands-on dedication has led to many product innovations and unique design features such as the two-piece fan coil system. This means there is no need to compromise for homes with difficult tight roof spaces.

The streamlined outdoor unit with unique louvre grille is designed to protect it from the elements and reduce maintenance. And for added peace of mind, each ActronAir system includes a 5 year residential warranty\*.

\* conditions apply

The attractive, simple-to-use controller gives you fingertip-control of up to four zones at once.

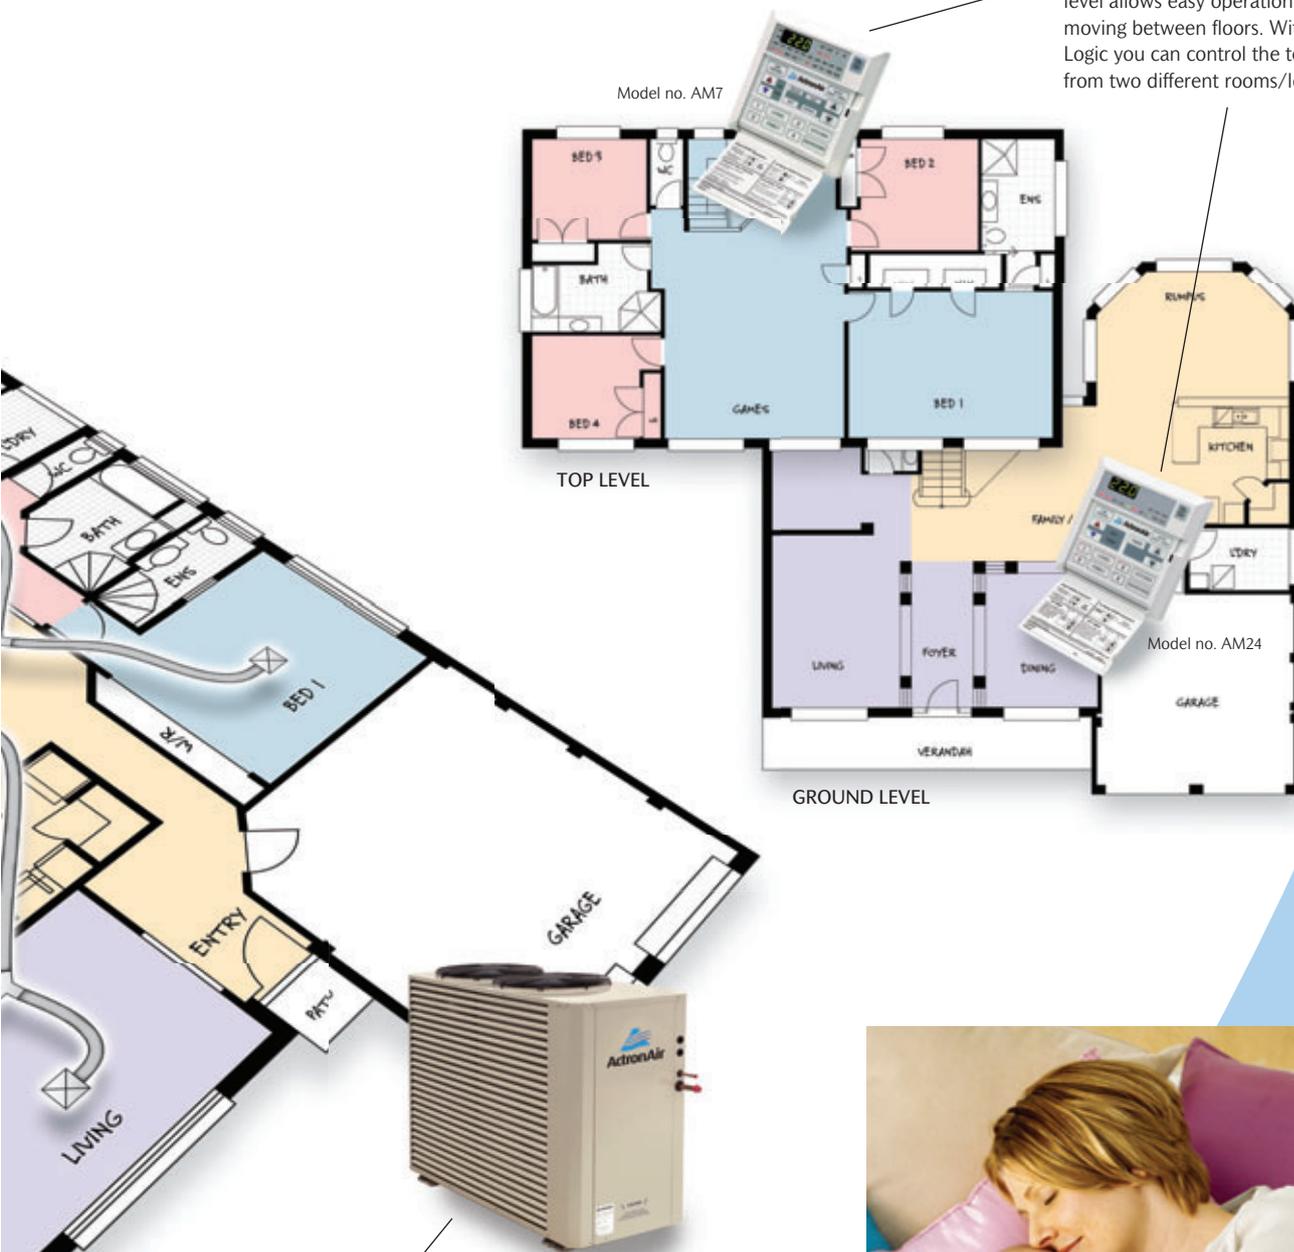

Even the most difficult, tight roof spaces are no obstacle with our unique two-piece fan coil system, providing quality air flow and smooth operation.

## DOUBLE-STOREY

In double-storey homes temperatures can vary up to 5°C between floors, so a separate control unit on each level is an ideal solution for greater comfort and efficiency.

An optional control unit for the second level allows easy operation without moving between floors. With its Mimic Logic you can control the temperature from two different rooms/locations.

Durable powder coating and unique louvre grille protect the outdoor unit from the elements and hard knocks, ensuring longer life and reduced maintenance. Extra large heat exchangers increase efficiency and reduce running costs.

Ideal for outdoor installations on small blocks or near boundary fences, the outdoor unit includes a vertical air discharge as standard for larger models.

## Command performance

ActronAir's stylish slimline controllers are easy to operate. Each control unit has an in-built sensor to monitor room temperature and can control up to 4 zones (8 zones optional). This enables more efficient and cost effective operation. All controllers are designed and built by ActronAir and are fully integrated to ensure each system provides the best performance.

- Easy to operate 24 hour timer
- Fully integrated control
- Dual-wall control capability (incorporating Mimic Logic)
- In-built temperature sensor
- Optional remote sensor
- 3-speed indoor fan
- Auto Heat/Cool Changeover
- Easy to read
- Home automation interface for remote on/off
- Optional 7-day controller available
- Optional upgrade to 8-zone controller available

Fully integrated zoning control

Important – The Local Electricity Supply Authority may require limits on – starting current, running current and voltage drop, please check prior to purchase.

Rated Conditions:

Cooling: 35°C DB Outdoor / Air Entering Indoor 27°C DB, 19°C WB, Heating: 7°C DB, 6°C WB Outdoor / Air Entering Indoor 20°C DB, Outdoor / Air Entering Indoor 21°C DB.

Operating Range: Cooling: 15°C DB to 50°C DB Outdoor / Air Entering Indoor 29°C DB, Heating: -5°C DB (R410A), Heating: -10°C DB) to 21°C DB

(1) EER Rated = Energy Efficiency Ratio (Rated Capacity Cooling + Rated Input Power Cooling)

(2) COP Rated = Coefficient of Performance (Rated Capacity Heating + Rated Power Heating)

(3) Recommended circuit breaker size. This should be used as a guide only, refer to AS/NZS 3000 'Australian/New Zealand Wiring Rules' for more details.

(4) Sound Pressure level at 3m distance is determined as the measured sound pressure at 3m perpendicular to the coil side of the condenser. Results are based on outdoor conditions over a hard reflecting surface for the ground plane only. Two values provided: one at low speed outdoor fan and one at high speed outdoor fan. Sound levels may vary in different locations and surroundings.

(5) Sound Power Levels are measured in accordance with the requirements of the Department of Environment and Conservation (NSW) under the Air Quality Management Act 1997 for the registration of air conditioning units. Conditions in Australia.

The measurement procedures contained in this regulation are consistent with Australian Standard AS 217.2 – Determination of Sound Power Levels of Noise Sources Part 2 – Precision Methods for Broad-Band Sources in Reverberation Rooms.

(6) Maximum number of zones using an 8 zone controller. This may need to be purchased separately.

(7) Complies with QLD Development Code MP4.1 minimum tested EER of 2.9 for Class 1 and Class 2 buildings from 1st July 2009. See [www.dip.qld.gov.au](http://www.dip.qld.gov.au).

(8) EER Tested = (Tested Capacity Cooling + Tested Input Power Cooling). For more information refer to [www.energyrating.gov.au](http://www.energyrating.gov.au). When the outdoor temperature exceeds the rated conditions, the cooling/heating capacities may decrease below the rated nett values. Specifications subject to change without notice.

5 year residential warranty – refer to Terms of Warranty document for full details.

2 year commercial warranty – refer to Terms of Warranty document for full details.

ActronAir Air Conditioning Units are MEPS Certified.

**MEPS CERTIFIED**

All systems specified in this brochure pass or exceed minimum government efficiency levels when tested to AS/NZS 3823.2:2005 Amdt 3-2008, at rated capacity.
